

Comfort Redefined for surgeons & medical staff

Feel relief, increase energy, be smart.

SmartCells® Anti-Fatigue technology helps reduce fatigue associated with standing for extended periods of time.

SmartCells® function like springs to return energy. The unique structure becomes softer as compressed. SmartCells® rebound instantly as weight is shifted for optimized anti-fatigue results.

Autoclave Safe

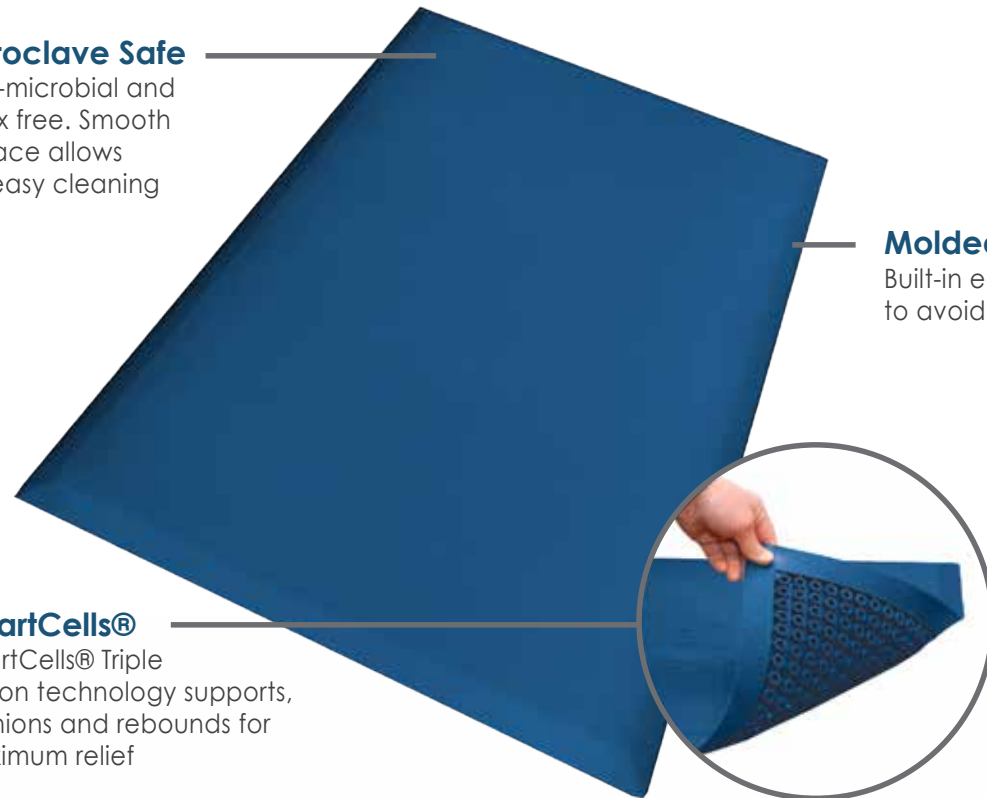

Anti-microbial and latex free. Smooth surface allows for easy cleaning

Molded Edge

Built-in edging to avoid tripping

SmartCells®

SmartCells® Triple Action technology supports, cushions and rebounds for maximum relief

Concentrate on your patient, not your discomfort.

Increase comfort. Decrease infection. Save money with reusable mats.

Technology

SmartCells® technology consists of an integrated rubber surface layer supported by an underlying array of cylindrical rubber cells that soften in response to surface pressure, then rebound like a spring creating a dynamic and stable surface. SmartCells® cushions and returns energy for optimal relief.

SmartCells® Mats:

used in specific operating room areas where discomfort from prolonged standing can interfere with concentration.

Sizes: 2'x3', 3'x5' and Octagon

Support

Cushion

Rebound

It's not Gel. It's not Foam. **It's SmartCells®.**
Experience the difference.

SmartCells® Step-Stool Mats:

ideal where ergonomic risers are needed in the operating room.

Single Surgery Riser

Double Surgery Riser

SmartCells® Runners: ideal for larger operating room areas, or wherever patients may be in danger from falling.

Sizes: 2' wide and 3' wide

SmartCells® Insoles also Available.
